Gas Monitor sales and service: We are a proud distributor of RKI Instruments. We can supply portable individual and multi-gas units, fixed systems, and a variety of custom solutions.

NCCER Crane Operator, Rigger, and Signal Person Certifications

Safety Manual: We can provide you with a custom-tailored and compliant manual to fit your needs.

On-line Accounts: We are equipped to handle all of your on-line account management needs. We work with ISNetworld, PICS, PEC Premier, BROWZ, etc. We can setup and maintain your accounts.

Safety Meetings/Training: We will coordinate your safety meetings to ensure compliance with your OSHA-mandated annual training, and the content of your manual. We will maintain a safety training matrix to track your annual training by topic and employee. Safety meetings can be set up with whatever frequency works for your operations—weekly, monthly, quarterly, or annually. We can provide training wherever and whenever it is most convenient for your employees. We will utilize fresh material and state-of-the-art equipment to conduct your training (i.e. BullEx Bullseye, multimedia presentations, quantitative fit testing, etc.).

Crane Operator Certification

On-site safety personnel

Aerial Lift

DOT Operator Qualifications (OQ)

Are you affected by the OQ Rule? The requirements of the DOT OQ Rule have placed a significant burden on pipeline operators and contractors. Our goal is to find the easiest, most cost-effective methods of compliance for all of our clients.

DOT Pipeline OQ Provider: We know you work for more than one operator, and they each have their own requirements for Qualification. We can help. We have certified evaluators for all OQ providers, such as NCCER, Veriforce, OQSG, ENERGY worldnet, MEA, and eWebOQ, etc.

On-site or In-house Instructors, Evaluators, and Proctors available

We will travel to you, anywhere, 7 days a week. We pride ourselves on Quality, Reliability, and Availability.

Onsite Safety Technicians/OQ Evaluators

Southland Safety provides qualified and experienced Safety Technicians and Evaluators to offer our clients a robust solution for managing compliance in the field. Southland can service large and small projects anywhere in the country. Southland has worked for both the Operators and Contractors and is experienced with the unique challenges each faces. Our technicians can assume responsibility for all aspects of safety/compliance on the jobsite: onboarding, atmospheric monitoring, drug & alcohol testing, safe operations, safety training/OQ, equipment/vehicle inspections, JSAs and other documentation, client/subcontractor communication, site audits, excavation inspections, etc. Over the last 25 years, Southland has worked thousands of miles of pipeline construction on some of the highest profile jobs in the country. If you need a single technician for several days or a dozen(s) for months, Southland can handle your needs.
